These tables are a supplement to the Historical Statistics of Newfoundland and Labrador Volume I (1) which was prepared by the Economics and Statistics Division, Department of Finance, Government of Newfoundland and Labrador, in October of 1970.

As this supplement is intended merely to update the data presented in Volume I (1), no detailed notes, definitions, or concepts are included in the supplement, and data from Volume I (1) is included only where necessary to clarify the presentation of the supplemental data. However, some of the 227 tables were not updated because the relevant data was not available, but these instances have been noted in a following table.

This supplement, Volume I (5), contains all the data in the first supplement, Volume I (2) published in November, 1971; in the second supplement, Volume I (3) published in November, 1972; and in the third supplement, Volume I (4) published in November, 1973.

Copies of the Historical Statistics of Newfoundland and Labrador can be obtained from the Department of Public Works and Services, Government of Newfoundland and Labrador, St. John's, Newfoundland, upon payment of \$4.50 per copy. Newfoundland and Labrador residents should remit 8% sales tax.

⁶ Listed separately as Bay D'Espoir and Milltown, Bay D'Espoir previous to 1971 census.

⁷ Buchans, the company town, is not a Local Improvement District. The figure given for 1971 and 1966 are for the L.I.D. of Buchans. The population for the company town of Buchans is as follows:

<u>1951</u>	<u>1956</u>	<u>1961</u>	<u>1966</u>	<u>1971</u>
1,944	2,413	2,463	2,159	1,907

⁸ Incorporation included the former unincorporated communities of Trepassey, Trepassey Lower Coast and Daniel's Point, L.G.C. This explains why no population is shown for Daniel's Point for 1971.

⁹ 1971 Population count includes Gargamelle

NSS - Not Separately Shown

* - Denotes change in Boundaries since 1966.

1 Old Age Assistance has been discontinued.

2 Includes persons receiving assistance in the form of food, fuel, rent, clothing, household maintenance and utilities, board and lodging, burials, housekeeper allowances, travelling, storage/trans. household effects and repairs to houses.

3 This series reflects a change in concept by the Department of Social Services and Rehabilitation in its Statistical reporting. The "original" series shown for both Long and Short Term Assistance reflect double counting in that Long Term cases also receiving Short Term Assistance were included in both the Long Term and Short Term data. Short Term data (REVISED) has been adjusted to exclude cases receiving both types of assistance; these cases now being reflected in the unadjusted (ORIGINAL) Long Term series only.

1 - Excludes a few persons looking for work who had never worked or who had worked only prior to January 1, 1970.

NOTE: Data in 1961 referred to the industry in which employed last week and, for those not employed (i.e., for the "looking" and "not in the labour force with a job in the previous year" categories) to their last job. The 1961 classification differs in some respects from that used in 1971 and definitions of each industry for 1961 and 1971 available from the Central Statistical Services should be consulted when making comparisons.

The actual computer program is carried out once a year and current seasonal adjustments are made by dividing the current figures by the predicted seasonal factors. The annual computer program not only predicts new seasonal factors, but also revises the entire historic series of seasonally-adjusted data in light of the most recent information on changes in seasonality.

Note: Data prior to 1966 are not consistent with the rest of the series. Before 1966 the populations used in computing the labour force statistics were not adjusted to the population from the 1966 Census. Also, in 1966 the sample was changed.

1. Previous to 1971 these estimates were based mainly on returns from employers having 15 or more employees in any one month of the year, and establishments employing less than 15 employees were sampled on a rotational basis. From 1971 onwards the estimates were based on returns received from employers having 20 or more employees (Larger Firm) in any one month of the year.

Larger Firm Employment as a percentage of total estimated employment in Forestry is approximately 93.9% based on 1970 Annual Averages.

Explanation:

1. The latest figures are subject to revision.
2. Certain counties are combined because of secrecy.
3. Data are not fully audited.
4. Data are incomplete since some establishments are included in provincial totals but are not assigned to counties.

Note: The data in the above table was collected in a Statistics Canada monthly survey of employment and payrolls covering firms having 20 or more employees in any month of the year. The following industries are excluded: agriculture, fishing and trapping, education, hospitals, religious and welfare organizations, public administration and defence.

1 A claimant is an insured person who applies for or is in receipt of benefit. An insured person qualifies to receive benefit if he (a) has had eight or more weeks of insurable employment in his qualifying period and (b) has had an interruption of earnings from employment.

Notes: i) Unemployment Assistance figures are included from April 1949 to March 1951.

ii) These data are overstated. For Canada the data are overstated by 20% to 25% in terms of active files. If a claimant does not report due to becoming re-employed a period of 5 weeks is allowed to elapse before the claim is transferred to the inactive file.

Note: Due to rounding figures may not add to totals.

1 - Supplementary labour income consists of other expenditures by employers on labour account that can be regarded as payment for employees' services. Included here are employers' contributions to pension funds, employee welfare funds, unemployment insurance and workmen's compensation. The portion of employers' contributions estimated to be for medical aid and hospitalization is not regarded as a form of employee income but as a payment by business for medical and hospital services.

1. - This table presents a more detailed breakdown of revenue sources than previously published in Table G-1 and closely parallels the revenue by source classifications published by Statistics Canada in the Financial Management Series.
2. - Revised
3. - Estimates - As approved by the Legislature.
4. - Payments on Account of Tax Rental Agreement prior to 1962-63.
5. - Prior to 1962-63 the Government of Newfoundland rented to the Federal Government its right to impose these taxes. In lieu of these rights the Province received from Ottawa sums of money as stated in the Tax Rental Agreements.

TABLE G-5 (Continued)

1. This table presents an historical Departmental expenditure series on a basis consistent with Departmental structures which now exist. Expenditures on account of the responsibilities of those Departments which existed under the old structure for the period 1962-63 to 1971-72 have been re-allocated to Departments now responsible for those functions.
2. Budgetary expenditure only. Non-Budgetary expenditures on account of debt retirement (Sinking Funds and Principal Redemption) are excluded.
3. Revised Estimates.
4. Estimates - as approved by the Legislature.
5. Expenditures under the DREE programme are included in appropriate departments.
6. Legislative and Executive Council expenditure and unallocated items comprise the "Other" category 1962-63 to 1971-72. Negatives () in Capital Account are due to rounding.
7. Capital Advances to Newfoundland Industrial Development Corporation (N.I.D.C.) to be utilized as loan funds are included as expenditure of the Department of Industrial Development to 1971-72. From 1972-73 these plus advances to N.I.D.C. on account of the Labrador Linerboard project are included as Capital expenditure of the Department of Finance.

Note: Indexes prior to May 1973 incorporate 1957 expenditure weights; those for May 1973 forward are based on 1967 expenditure. The revised series is linked to its predecessor at April 1973.

¹ - Until April 1973, the shelter element of housing moved on the basis of changes in rents only. However, from May 1973, home ownership has been included in the shelter element of housing indexes, so that the Canada and regional city shelter indexes now contain the same element.

NOTES: These definitions have changed since the Historical Statistics was published in 1970:-

Extent of Employment: This question is designed to indicate the extent to which men are engaged in the inshore fisheries. This measurement is to be strictly on the basis of time engaged in fishing activity. Fishing activity will, therefore, be defined to cover the time spent preparing for, actually fishing, and storing boats and gear away after the season. When considering the time spent preparing, do not include repairing boats or gear during the off-season. However, such time spent during the fishing season should be considered as fishing activity.

Full-time: Those engaged in fishing activity 10 months or more of the year.

Part-time: Those engaged in fishing activity for less than 10 but more than 5 months of the year.

Casual: Those engaged for less than 5 months of the year.

1. Commencing with the second quarter of 1973 there is a structural change in this table. The new title should be Total General Government Employment and Gross Payrolls. This consists of Government Departments, Administrative, Regulatory and Special Funds and Government Owned and Financially Supported Institutes. This change has resulted in the addition of: Newfoundland & Labrador Computer Services, Newfoundland Farm Products Corporation, Newfoundland Medical Care Commission, College of Trades and Technology, and College of Fisheries, to government employment and payrolls. The only deletion from employment and payrolls is Memorial University of Newfoundland.
