This publication is intended to provide those statistical series which are most commonly used. Because of the quantity only a small number of tables from the censuses have been included.

In order to keep the publication to a reasonable size monthly and subprovincial data are not included. Where these are available they are noted at the bottom of the table.

This publication is arranged into 24 sections. At the beginning of each section there are notes and explanations. As well a keyword index, relating to the tables, is included in the back. Each table has the source at the bottom. In the "Additional Data" notes at the bottom of each table it indicates whether the series is available; on a more frequent basis, (such as monthly or quarterly), for a smaller geographic area, or in more detail. Any questions on the additional data should be directed to Newfoundland Statistics Agency, Phone: 737-2913, since the source may not be the same as for the table.

This Volume contains all of the information which was available in Volume II (2).

Number and Annual Growth Rate of Population, Newfoundland and Labrador, For Census Years 1836 to 1976
A-2 Births, Deaths, Net Natural Increase, Marriages, Divorces and Rates Per Thousand Population, Newfoundland and Labrador, 1921 To 1979 $\qquad$

Population, By Selected Age Groups and Sex, Newfoundland and Labrador, For Selected Years 1935 tc 1979

Number and Percent of Population, By Marital Status, Newfoundland and Labrador, For Census Years 1901 to 1976
A-5 Population, By Religious Denomination, Newfoundland and Labrador, For Selected Years 1857 to 1971
A-6 Number and Percent of Population, By Ethnic Origin, Newfoundland and Labrador, 1945, 1951,1961 and 1971
Population, By Census Division and Sex, Newfoundland and Labrador, 1951, 1956, 1961, 1966, 1971 and 1976

Households, By Type and Number of Persons Per Household, Newfoundland and Labrador, 1966, 1971 and 1976
Population of Incorporated Cities, Towns, Local Improvement Districts, Local Government Conmunities and Rural Districts, Newfoundland and Labrador, 1951-1976

Number of Physicians, Dentists and Registered Nurses, Per 1,000 Population, Newfoundland - Labrador, 1968 to 1979 Selected Statistics of Operating Hospitals, Newfoundland and Labrador, 1953 To 1980 Selected Statistics of Social Assistance, Newfoundland and Labrador, For Month of March, 1973 to 1980 Family Allowance and Youth Allowance Statistics, Newfoundland and Labrador, Fiscal Years $1949-50$ to $1979-80$ 0ld Age Security and Guaranteed Income Supplement Statistics, Newfoundland, Fiscal Years $1951-52$ To $1979-80$

Number of Beneficiaries Under the Canada Pension Plan, By Type of Benefit, Newfoundland and Labrador, For Month of March, 1967 to 1980

Population 15 Years of Age and Over, Participation Rate, Labour Force, Employed, Unemployed, Unemployment Rate and Not in the Labour Force, Newfoundland and Labrador, 1966 to 1980

Male Population 15 Years of Age and Over, Participation Rate, Labour Force, Employed, Unemployed, Unemployment Rate, and not in the Labour Force, Newfoundland and Labrador, 1975 to 1980

Female Population 15 Years of Age and Over, Participation Rate, Labour Force, Employed. Unemployed, Unemployment Rate, and not in the Labour Force, Newfoundland and Labrador, 1975 to 1980

Labour Force, By Age Group and Sex, Newfoundland and Labrador, 1951, 1961, 1971, 1976 and 1980
Labour Force ${ }^{2}$ By Occupation Group, Newfoundland and Labrador, 1971 And 1980
Labour Force ${ }^{1} 15$ Years And Over By Industry Divisions, Newfoundland and Labrador, 1951, 1961 , 1971 And 1980
Estimates of Employees By Industry, Newfoundland and Labrador, 1961 to 1980
Unemployment Rate and Participation Rate, For St. John's CMA, Economic Regions, Newfoundland and Labrador, 1975 To 1980

| x-3 | Normal Precipitation and Wind Speed For St. John's, Gander and Goose Bay ........... |

## MAP 1

## Census Divisions

of Newfoundland \& Labrador 1971

## SECTION A

## POPULATION AND VITAL STATISTICS

TABLE A-1

## Population

De jure (resident) population as enumerated in Census years or estimated for inter-censual years.

TABLE A-2

See Tab1e A-1, A-4

Births

Infants born alive, i.e. excluding stillbirths.

Deaths

Deaths excluding stillbirths.

Net Natural Increase

Net natural increase is calculated by subtracting births from deaths.

TABLE A-3

See Table A-I

Age

Age classifications in the census are based on a definition which specifies completed years of age at last birthday prior to the census date.

TABLE A-4

See Table A-1.

## Marital Status

Refers to the conjugal status of a person.
Single (never married): Persons who never married (including all persons less than 15 years) and persons whose marriage was annulled.

Now Married: Persons whose husband or wife is living, unless the couple are separated or a divorce has been obtained; persons living common-1aw are considered as "Now Married".

Widowed: Persons who have lost their spouse through death and who have not remarried.

Divorced: Persons who have obtained a legal divorce and have not remarried.

Separated: Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce. They may or may not be legally separated.

TABLE A-5

See Table A-1.

TABLE A-6

See Table A-1.

## Ethnic Group

Refers to ethnic or cultural background traced through the father's side. This question should not be confused with citizenship which refers to the country to which the person owes allegiance. Language spoken by the person or by his paternal ancestor on first coming to this continent was a guide to the determination of ethnic or cultural group in some cases.

TABLE A-7

See Table A-1.

## Census Division

Statistical areas that have been created as a equivalent for countries and delineated by Statistics Canada in co-operation with the province. There are ten Census divisions in Newfoundland. See map section.

TABLE A-8

See Table A-1.

TABLE A-9

Household

A person or a group of persons occupying one dwelling unit is defined as a household. The number of households will therefore be equal to the number of occupied dwellings. See notes in Table P-2 for definition of 'dwelling".

TABLE A-10

TABLE A-11

See Tables $\mathrm{A}-1, \mathrm{~A}-2$

## Emigration

Designates migration from Canada to a foreign country.

## Immigration

Designates migration into Canada from a foreign country, by persons with a "landed" status.

## In-Migrant

Any person who takes up residence in another Canadian Province.

## Interprovincial Migration

Designate movements from one province to another, where there is a change of address.

Net International Migration
Difference between the number of immigrants and the number of emigrants.

## Net Interprovincial Migration

Difference between the number of in-migrations and the number of out-migrations.

## Out-Migrant

Any person who leaves a province to take up residence in another province.

Total Increase
Total increase is the sum of natural increase and total net migration.

Total Net Migration
Sum of the net interprovincial migration and the net international migration.

Year
Unless otherwise indicated, refers to census year, i.e. year beginning June 1 of year $t$ and ending May 31 of year $t+1$.

TABLE A-1
NUMBER \& ANNUAL GROWTH RATE OF POPULATION,
NEWFOUNDLAND AND LABRADOR, FOR CENSUS YEARS 1836 TO 1976

Notes: During the period from 1836 to 1945 the Newfoundland Government conducted eleven censuses. Since 1949 the Dominion Bureau of Statistics conducted six censuses in Nfld. and Labrador, and have prepared population estimates for the intercensal years. Population estimates are for June 1 of each year.

Additional Data: Yearly; Quarterly; Census Divisio:; A e and Sex; Projections by age and sex to 2001.

Source: Ccatis of Canada, Census of Newfoundland.

Notes: 1 - Includes persons who did not state age.
2 - These figures are Statistics Canada estimates as of June 1,1979 and are subject to revision following the 1981 Census. - All 1971 and 1976 census data have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random (either up or down) to " 0 " or " 5 ". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adaing any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions
Data: Census Divisions, Census Subdivisions, Incorporated Communities, Federal Electoral Districts; For Census year 1951, 1961 and 1971 substantial data are available on population, families, households, housing, economic characteristics (labour force, occupation, industries, income) and agriculture. For Census years 1956, 1966 ande

## TABLE $A 10$

## POPULATION OF INCORPORATED CITIES, TOWNS, LOCAL IMPROVEMENT

DISTRICTS, LOCAL GOVERNMENT COMMUNITIES AND RURAL DISTRICTS,
NEWFOUNDLAND AND LABRADOR, 1951-1976

- Continued -

Notes: Up to the date of incorporation the populations shown were taken from the populations of the unincorporated coununities. The populations of the incorporated areas are not strictly comprable to the populations before incorporation. The same is true for boundary changes.
c - city
t - town
com.- Community
Under "the Municipalities Act", effective April 1, 1930, all Local Improvement Districts (L.I.D.'s) and Rural Districts (R.D.'s) became towns (t) and all Local Government Communities becane communities (com.).
Local Improvement District previous to 1971 Census.
2 Local Government Community previous to 1971 Census.
3 Rural District previous to 1971 Census.
4 Pasadena - Midland previous to 1971 Census.
5 Listed separately as Bay D'Espoir and Milltown, Bay D'Espoir previous to 1971 Census.
6 Buchans, the company town, incorporated in 1976 is not included in these populations. The population for the company town of Buchans is as follows:

$$
\frac{1951}{1,944} \quad \frac{1956}{2,413} \quad \frac{1961}{2,463} \quad \frac{1966}{2,159} \quad \frac{1971}{1,907} \quad \frac{1976}{1557}
$$

7 Incorporation included the former unincorporated commities of Trepassey, Trepassey Lower Coast and Daniel's Point, L.G.C. This explains why no population is shown for Daniel's Point for 1971

81971 Population count includes Gargamelle.
9 Includes part of the surrounding area.
10 Bay Roberts Town annexed Bay Roberts East L.G.C. and part of Subdivision K in 1965 and the town of Coley's Point in 1964.
11 Coley's Point annexed by Bay Roberts in 1964; towns of Corner Brook East, Corner Brook West and Curling, and part of unorganized area amalgamated to form Corner Brook City, January 1, 1956; Mouse Island annexed by Channel - Port aux Basques in 1964.
12 Dark Cove L.I.D. crcated in 1962. Middle Brook South annexed in 1965. Dark Cove West and Middle Brook North annexed in 1970. In 1973 name was changed to Dark Cove - Middle Brook - Gambo, L.I.D.
13 Town of Happy Valley incorporated 1960; Goose Bay, L.I.D. incorporated 1970, and town of Happy Valley - Goose Bay, incorporated 1975.
14 The official Census count for 1966 was 444. Sixty-two porsons were erroniously left out and have been added back to Woody Point to make 506 .
15 Incorporated as a Rural District.
NSS - Not Shown Separately.

*     - Denotes change in boundaries due to annexation or incorporation

## SECTION B

## HEALTH AND WELFARE

## SECTION "B"

## Table B-1

## Physicians

Represents persons active on a full and part time basis (at year end) in occupation group number 3111 of Statistics Canada, Occupational Classification Manual 1971, defined as follows:
"This group includes occupations concerned with diagnosing, preventing and treating diseases and illnesses in humans. Includes occupations of general practitioners in medicine and surgery; and specialists in medicine such as anaesthetistis, neuro-surgeons, urologists, cardiologists, gypaecologists, pathologists, psychiatrists, and radiologists. Interns and resident physicians in hospitals are in this group."

## Dentists

Represents persons active on both a full and part time basis (at year end) in occupation group number 3113 of Statistics Canada, Occupational Classification Manual 1971, defined as follows:
"This group includes occupations concerned with examining, diagnosing, preventing and treating ailments or abnormalities of gums and teeth, including oral surgery. Dental hygienists and assistants are excluded."

## Registered Nurses

Represents Professional Nurses registered in Canada and employed in Newfoundland on both a full and part time basis (at year end) in occupation groups 3130 and 3131 of Statistics Canada, Occupation Classification Manual 1971, defined as follows:
"This group includes occupations concerned with supervising and co-ordinating the activities of personnel engaged in nursing and related tasks and occupations concerned with giving nursing care to the sick, injured and infirm; giving nursing advice; assisting physicians and performing other nursing tasks in establishments; such as, hospitals, clinics, schools, industrial plants, private and nursing homes."

TABLE B-2

## Operating Hospitals:

Are health care institutions, in operation at the end of the reporting period, December 31 until 1975 and March 31 from 1976 and following years, where patients are accommodated on the basis of medical need and are provided with continuing medial care and supporting diagnostic and therapeutic services, and which are licensed or approved as hospitals by a provincial government.

Approved Bed Complement:
The number of beds and cribs (bassinets) approved for the hospital, or a unit of the hospital, as at year-end of the reporting year, by the Provincial authority.

Admission:
The official acceptance into a hospital of a patient (including an infant born alive in the hospital) who requires medical and hospital services including room and board.

Inpatient:
Is a person who has been admitted to a hospital for medical and hospital services and who has been assigned an inpatient bed.

## Table B-3

## Employable Cases:

Able bodied individuals or heads of families in receipt of basic social assistance. There persons do not expect to have the necessary income in the short run to maintain themselves or their families for one of the following reasons: a) long term unemployment; b) seasonal unemployment; c) insufficient earnings from full-time employment; d) insufficient earnings from part-time employment.

## Other Cases:

a) Persons in receipt of basic social assistance who do not expect to have the necessary income in the short run to maintain themselves or their families for reasons other than unemployment and insufficient earnings; a small number of these persons are also in receipt of long term assistance, and are also counted as long term assistance cases. Therefore some double counting does occur in the "Other Cases" category.
b) Persons in receipt of long term social assistance whom for social or physical reasons do not expect to have the necessary income to maintain themselves or their families.
c) Persons in receipt of Blind Persons Allowance and Disabled persons Allowance.

## Persons Dependent Upon

Individuals and heads of families and persons in families dependent upon Social Assistance.

## Basic Social Assistance

Assistance received in one or more of the following forms: focd; fuel; rent; clothing and personal care; household maintenance and utility; board and lodging.

## Special Social Assistance

Assistance received in one or more of the following forms: Burials; housekeeper allowance; travelling; storage/transportation household effects; repairs to houses.

Table B-6

## Canada Pension Plan

The Canada Pension Plan, which started in 1966, is a contributory social insurance program designed to help people who work in Canada build a better future for themselves and their families by providing a basic level of protection against the contingencies of retirement, disability and death. The Plan operates in all parts of Canada, except in the Province of Quebec, which has its own similar pension program. However, the plans are closely co-ordinated so that contributors are protected wherever they may work in Canada. The amounts payable for each type of benefit available under the Plan are adjusted annually in accordance with the Consumer Price Index.

## Retirement Pensions

Retirement pensions were first payable in January 1967 with the pensionable age being lowered gradually to age 65 by 1970. Generally speaking, the retirement pension can be calculated at 25 percent of the current value of the contributor's monthly pensionable earnings averaged over the entire period in which he/she could have contributed to the Plan. A person must contribute to the Plan for a minimum of ten calendar years to qualify for a full Retirement Pension.

## Disability Pension

Disability pensions are available to contributors who have severe and prolonged physical or mental impairment that prevents them from pursuing any substantially gainful occupation. A monthly benefit amount is paid for each dependent child of a disabled contributor (Disabled Contributor's Child's Benefit).

Survivors Benefits
Survivors benefits include a lump sum Death Benefit payable to the estate of the deceased contributor; a monthly pension payable to the surviving spouse; and monthly benefits for the dependent children of the deceased contributor (orphan's benefits).

Combined Pensions
Combined pensions refers to the amount a person may receive through a retirment of a disability pension together with a surviving spouse's pension.

1. Comnencing January 1974 Family Allowances were payable on behalf of children under 18 years of age who were wholly or substantially maintained by a parent or other individual resident in Canada. Prior to that time Family Allowance was paid on behalf of children under 16 years who had to be not only dependent but also attending school in accordance with provincial law.

The Youth Allowance program was in effect until the new Family Allowance Program was introduced in 1974. Youth Allowance being paid to all dependent children 16 and 17 years who were attending educational institutions full time or were prevented from doing so because of mental or physical disability.

The rate structure for Eamily Allowance Payments changed over time. To September 1973 monthly rates ranged from \(\$ 5\) to \(\$ 8\) per child depending on the age of the child. Conmencing october 1973 a 9 imilar allowance was paid to all children regardless of age increasing from \(\$ 12.00\) per child in October 1973 to \(\$ 20.00\) in January 1974, to \(\$ 22.08\) in January 1975, to \(\$ 23.89\) in January 1977, to \(\$ 25.68\) in January 1978, back to \(\$ 20.00\) in January 1979 and to \(\$ 21.80\) in January 1980.
2. Youth Allowances were \(\$ 10,00\) per month per child to September 1973 and \(\$ 12.00\) per month from October to December 1973 . The program was discontinued after December, 1973.

Additional Data: Monthly Accounts changing province of residence; Familics receiving Allowance by Size of family.

解 980. Commencing October 1973 the present arrangements became operative, whereby the old age security pension is escalated quarterly at the full rate of increase in the Consuner Price Index.
2) The Guaranteed Income Supplement program which became operative in January, 1967, was established to supplement the income of old Age Security recipients so that their monthly income from all sources would not fall below specified levels. Full or partial supplement would be paid to the recipient based on the income of the pensioner and his spouse in the calendar year preceding the benefit year. The maximum supplement has increased over time from \(\$ 30.00\) in January 1967 to \(\$ 149.76\) in January 1980 for single and one-pensioner families and from \(\$ 60.00\) to \(\$ 12452\) each over the same period for two-pensioner families. Guaranteed Income Supplement payments have been escalated quarterly since anril, 1973 by the full increase in
3) Data shown for 1969-70 and 1971-72 are as of May 1970 and 1972 respectively.
4) In October, 1975 an additional program was introduced to provide monthly allowances to spouses of old Age Security Pension recipients, with spouses between 60 and 65 years of age and meeting resident requirements qualifying. Maximum monthly spouses allowances increasing from \(\$ 209.81\) at the inception of the program to \(\$ 306.94\) in January 1980 . Data shown for fiscal year 1975-76 relate to the period "October - March" only.

\section*{SECTION C}

\section*{LABOUR FORCE}

\title{
SECTION "C"
}

\section*{TABLE C-1}

\section*{Employed}

The employed includes all persons who, during the reference week:
(a) did any work* at all
(b) had a job but were not at work due to:
- own illness or disability
- personal or family responsibilities
- bad weather
- labour dispute
- vacation
- other reason not specified above (excludes persons on laymoff and persons whose job attachment was to a job to start at a definite date in the future).
* Work includes any work for pay or profit. That is, paid work in the context of an employer - employee relationship, or self-employment. It also includes unpaid family work where unpaid family work is defined as unpaid work which contributed directly to the operation of a farm, business or professional practice owned or operated by a related member of the household.

\section*{Labour Force}

The civilian labour force is composed of that portion of the civilian noninstitutional population 15 years of age and over who, during the reference week, were employed. or unemployed.

\section*{Not In The Labour Force}

The not in the labour force is that portion of the civilian noninstitutional population 15 years of age and over who, during the reference week, were neither employed nor unemployed.

\section*{Participation Rate}

The participation rate represents the labour force as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force in that group expressed as a percentage of the population for that group.

\section*{Unemployed}

The unemployed includes those persons who during the reference week:
(a) were without work, but actively looked for work in the past four weeks (ending with reference week), and were available* for work
(b) had not actively looked for work in the past four weeks but had been on layoff** for twenty-six weeks or less and were available* for work
(c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from reference week, and were available* for work.
* Persons in this group meeting the following criteria are regarded as available:
(i) were full-time students seeking part-time work who also met condition (ii) below. (Full-time students looking for full-time work are classified as not available for work in the reference week).
(ii) reported that there was no reason why the could not take a job in reference week, or, if they could not take a job it was because of "own illness or disability" or "personal or family responsibilities" or "already had a job".
** Persons are classified as being on layoff only when they expect to return to the job from which they were laid off.

\section*{Unemployment Rate}

The unemployment rate represents the number of unemployed persons as a per cent of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the unemployment in that group expressed as a per cent of the labour force for that group.

TABLE C-2
See Table C-1.

\section*{TABLE C-3}

See Table C-1.

\section*{TABLE C-4}

For 1978 data See Table C-1.
For 1951, 1961, 1971, and 1976 data:

\section*{Labour Force}

Refers to non-inmates 15 years and over who, in the week prior to enumeration, worked for pay or profit, helped in unpaid family work, looked for work, were on temporary lay-off, or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours.

While the labour force concept has changed only marginally since 1951, the questions asked to measure this concept have changed markedly from census to census. Each set of labour force questions has produced different response problems resulting in data which is not entirely comparable. The major response problems since 1951 are: underenumeration of unpaid family workers (1951) underenumeration of unemployed labour force (1961), and overenumeration of female unpaid family workers (1971).

Age
Age classifications are based on a definition which specifies completed years of age at last birthday prior to the reference date.

\section*{TABLE C-5}

\section*{Labour Force}

For 1971: The Labour Force concept is the same as the one that is used in TABLE C-4 with the restriction that persons looking for work who last worked prior to January, 1970, or who never worked are excluded.

For 1978: See Table C-1.

\section*{Occupation}

Refers to the specific kind of work the person did on the job, as determined by the reporting of the kind of work, the description of the most important duties and the job title. For 1971, data relate to the respondent's job in the week prior to enumeration if he or she had a job during that week or the job of longest duration since January, 1970, if not employed in that week. Persons with two or more jobs during the reference week were asked to give the information for the one at which they worked the most hours.

\section*{Industry}

The industry classes are based on the general nature of the business carried out in the establishment where the respondent was employed as indicated by the reporting of the name of the employer ( or by the business name if self-employed) and the kind of business, industry or service engaged in by this establishment. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Labour Force

For 1951, 1961 and 1971 data see Table C-4 definitions.

For 1978 data see Table C-1 definitions.

TABLE C-8

See Table C-1.

TABLE C-9

See Table C-1.

\section*{Full Time Employment}

Full-time employment consists of persons who usually work 30 hours or more per week, plus those who usually work less than 30 hours but consider themselves to be employed full-time. Parttime employment consists of all other persons who usually work less than 30 hours per week.

Part-Time Employment
See Full-Time Employment.

Notes: The data in this table are consistent with data from the Revised Labour Force Survey which was introduced in January, 1975. The data for 1975 are actual estimates derived from the revised survey which was carried out in parallel with the former survey in 1975. For the period 1966 to 1974 , data seifies from the former survey have been revised on the basis of the observed relationships between the two surveys in 1975.

Additional Data: Monthly; Economic Regions, St. John's CMA; seasonally adjusted data, sex, age, marital status, class of work, education, hours worked, full-time, part-time, family status, industry, occupation, duration of unemployment, unemployed by looking/not looking for work, reason for leaving last job, unemployed by type of work sought, families with at least one unemployed person by number of employed persons.

\section*{SECTION D}

\section*{WAGES AND WORKING CONDITIONS}

\title{
SECTION "D"
}

\section*{TABLE D-1}

\section*{Labour Income}

Labour income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces.

\section*{Supplementary Labour Income}

Supplementary labour income consists of other expenditures by employers on labour account that can be regarded as payment for employees' services. Included here are employers' contributions to pension funds, employee welfare funds, Unemployment Insurance and Workmen's Compensation. The portion of employers' contributions estimated to be for medical aid and hospitalization is not regarded as a form of employee income but as a payment by business for medical and hospital services.

\section*{Wages and Salaries}

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Wages and salaries paid to self employed persons are excluded.

TABLE D-2

\section*{Industrial Composite}

Includes all industries except agriculture, fishing and trapping, education and related services, health and welfare services, religious organizations, private households and public administration and defence. The employment in the industrial composite represents about \(54 \%\) of total employment.

\section*{TABLE D-3}

\section*{Census Division}

Statistical areas that have been created as an equivalent for counties, and delineated by Statistics Canada in co-operation with the province. There are ten census divisions in Newfoundland. See map section.

TABLE D-4
Beneficiaries
Beneficiaries represent the number of persons drawing \(\$ 1.00\) or more of unemployment insurance benefit for one week out of each month. The week chosen is the same as that used by the Labour Force Survey (See Table C-l).

\hline
\end{tabular}

Notes: 1 - Includes Unemployment Assistance.
2 - From 1949 to 1978 the data are net payments, that is, gross payments after adjustments. After 1978 the data are gross payments.
3 - The number of beneficiaries is available only from 1976.
4 - The new Unemployment Insurance Act came into force on June 27, 1971. Under this program coverage was almost universal as of January 2, 1972.

Note that the count of beneficiaries cannot be related to the benefit payments made during a month as the latter figure covers all benefits paid during the month whereas the beneficiary count is the actual number qualifying for benefits for a specific week each month regardless of when payment is received.

Additional Data: Monthly; Districts, Census Divisions; age, sex, weeks on claim, dependency status, number of claimants.

SECTION E

EDUCATION

\section*{TABLE E-1}

\section*{Public Schools}

Schools which are supported by local taxation, supplemented by provincial grants and administered by local school boards in accordance with the education act of the province.

\section*{Special Classes}

Those for students with special problems in the regular curricula of the public school system. The majority of these students are in remedial programs, primarily remedial Mathematics and Reading. To a lesser extent this category also includes students with various handicaps (sight, hearing) which are, however, not so serious as to cause these children to be referred to special institutions for their education.

\section*{TABLE E-2}

Teachers
Persons employed in Public Schools on a full time basis only.

\section*{TABLE E-3}

\section*{Regular Students}

Students who meet the matriculation requirements of the University and are registered in, at least four courses in any semester are termed Regular Students. For purposes of Residence Requirements, a student is deemed to have been in attendance for an academic year as a Regular Student if during each of two consecutive semesters he/she was registered in at least four courses and at the end of this time has completed at least three full credit courses or equivalent.

Second, Third, Fourth and Fifth year students are those who have earned not less than six, sixteen, twenty-six and thirty credits respectively at the beginning of the academic year.

\section*{Partial Students}

Students registered in fewer than four courses in any semester are termed Partial Students. Included are part-time off-campus students.

\section*{Graduate Students}

Students that are formally admitted by the University to a program of studies leading to a Masters or Doctorate Degree or a Graduate Diploma.

TABLE E-5
Provincial Vocational Schools
Provincial Vocational Schools nineteen in total include the College of Trades and Technology, St. John's, the seventeen District Vocational Schools and the Stephenville Adult Centre. Also included in this table are persons graduating from courses at the Craft Centre, St. John's.

\end{tabular} District Vocational Schools and College of Fisheries

1 - Includes the Stephenville Adult Centre and the Craft Centre, St. John's. Includes the Bay St. George Community College commencing 1977-78.
2 - In this year regulations changed so that a Record of Achievement was only awarded when a student successfully completed the entire course; thus the reduced number of "graduates".

Additional Data: Similar data is available for the period that the various vocational schools have been operational. Data for the College of Fisheries is available by course from 1964. Data is also available on enrolement by course for each of the schools.

\section*{SECTION F}

\section*{PRODUCTION}

\section*{AND}

INCOME

Table F-1

\section*{Provincial Gross Domestic Product at Market Prices}

Is defined as the market value of the unduplicated total of goods and services produced in a given geographical area in a given period of time. It is measured by summing: (1) the incomes of the various factors of production which are earned within the geographical boundaries of the province and (2) the non-factor costs of capital consumption allowances (depreciation) and indirect taxes net of subsidies which contribute to the market price of goods and services.

For an outline of definitions, concepts and methods related to this table see the source publication or Statistics Canada, Catalogue 13-549E.

Table F-2

\section*{Personal Disposable Income}

Is the amount left over from Personal Income after payment to government of Personal Direct Taxes (Personal Income Taxes, Succession Duties and estate taxes, and Employer and Employee Contributions to social insurance and government pension funds) and various other fees, licences and permits. This amount is available to be spent on consumer goods and services, transferred to other sectors, or saved.

\section*{Wages, Salaries, and Supplementary Labour Income}

Wages and salaries cover all of the earnings from employment of Canadian residents paid for work performed, including payments in kind such as free board and lodging. Also included are such payments as commissions, directors' fees, tips and bonuses, and taxable allowances such as cost-of-living allowances and allowances in respect of holidays and sick leave. The estimates do not include earnings from selfemployment or partnership, income from independent professional practice, income of farmers from farming operations, or military pay and allowances. Wages and salaries are estimated before tax deductions, and before contributions of employees to unemployment insurance, pensions, and other social insurance schemes.

Supplementary labour income consists of other expenditures by employers on labour account that can be regarded as payment for employees' services. Included here are employers' contributions to pension funds, employee welfare funds, unemployment insurance, and workmen's compensation.

Net income of non-farm unincorporated business consists of the earnings of working proprietors from their own business in the form of wages and salaries, profits, interest, and rents. Such businesses are "unincorporated" as distinct from the corporate forms of organization. Included in this income category are the earnings of professional practitioners such as doctors, dentists, lawyers and engineers and als o earnings of self-employed fishermen.

Also included is the net rental income (gross rents less expenses) of persons and unincorporated business, including imputations for owner-occupied dwellings.

Interest, Dividends \& Miscellaneous Investment Income of Persons
Includes incomes received by persons \& unincorporated business from corporations, government business enterprises, and non-resident sources in the form of interest and dividends; interest on the public debt paid to persons; and the interest accruing on private pension funds, life insurance funds, and on funds invested by other "associations" of individuals".

\section*{Government Transfer Payments to Persons}

Is comprised of unilateral payments from governments to persons for which there has been no exchange of goods and services. i.e. family and youth allowances; unemployment insurance benefits; veterans' pensions; old age security fund payments; Canada and Quebec Pension Plan benefits; direct relief; workmens compensation benefits; grants to non-commercial institutions (post-secondary education institutions and benevolent associations) ; etc Excluded is interest on the public debt.

\section*{Other}

Includes Military Pay and Allowances; Net income received by farm operators from farm production; current transfers in the form of capital assistance grants from government to unincorporated business charitable and other contributions to non-commercial institutions from corporations; and transfers to persons from the non-resident sector such as personal and institutional remittances and pensions received from abroad.

\section*{Table F-3}

\section*{Census Value Added}

Census Value added is obtained by deducting from the gross value of shipments or accrued operating revenue, the cost of intermediate materials and process supplies used, fuel and electricity consumed and customs charges. The gross value of shipments is taken exclusive of excise and other sales taxes and is adjusted for changes in inventory of finished goods and goods in process.

\section*{Tab1e F-5}

\section*{Census Family}

To be defined elsewhere

Income
Income is comprised of that received from wages and salaries, business or professional practice, farm operations, family and youth allowances, government old age pensions, unemployment insurance, social assistance, other government payments, retirement pensions from previous employment, bond and bank interest and dividends, other investment sources and other sources.

\section*{Table F-6}

\section*{Gross Provincial Expenditure at Market Prices}

While Provincial Gross Domestic Product at market prices measures output as the sum of incomes received by factors of production etc; Gross Provincial Expenditure at market prices measures output as the sum of all sales of the provinces output to final purchasers i.e. to consumers, governments, businesses (on capital account), and export markets. In compiling the Gross Provincial Expenditure series adjustments are made for the following:
1) Unsold output which is not sold to the final purchasers but contributes to inventory stock and;
2) Imported goods and services which are purchased by the final consumer but not produced within the province.

For an outline of definitions, concepts and methods related to this table see the source publication or Statistics Canada, Catalogue 13-549E.

\section*{Government Sector}

In the Accounts the government sector is defined to cover three main groups of activity:
1) Departmental activities of the three levels of government - federal; provincial and local ordinarily included in the so-called "budgetary" transactions of governments;
2) the transactions of many government administered social insurance and trust funds such as the Unemployment Insurance Fund, the old age Security Fund, Workmen's Compensation Funds, the Canada Pension Plan, and various government employee pension funds - ordinarily regarded as "extra budgetary" transactions of governments;
3) the transactions of various government agencies, commissions, and boards which are financed out of public funds, and therefore operate on essentially non-commercial basis. i.e. such federal agencies as the National Research Council, the National Film Board etc; such provincial agencies as hospital and health services commissions, and various municipal boards and agencies including school boards and municipal waterworks authorities.

Specifically excluded from the government sector are certain government agencies whose activities involve the production of goods and services for sale on the open market at a price to the consumer which is intended to compensate wholly orlargely for their costs or to yield a profit. Such agencies are classified in the Accounts as Government Business Enterprises.

\section*{Surplus or Deficit on a National Accounts Basis:}

The saving out of current income and outlay (total revenue less total current expenditure), together with capital consumption allowances, provide the source of financing for the government sector's expenditure in physical assets (gross capital formation). The surplus (+) or deficit (-) on these capital financing transactions provides a measure of the overall fiscal posture of the government sector;

For an outline of definitions, concepts and methods related to this table see the source publication or Statistics Canada catalogue 13-549E.

\(i\) - Census value added for the Forestry, Mining and Manufacturing Industries is now reported by Statistics Canada on a "Total Activity" basis. The remaining industries continue to be reported on a main activity basis.
2 - Logging only - excludes stumpage.
3 - Primary Fishing only - represents value of landings.
4 - Includes Fish and Forest Product Processing.

\section*{SECTION G}

\section*{PROVINCIAL GOVERNMENT FINANCE}

Table G-1
Current Account

Tax Equalization or Tax Rental (Federa1)
Prior to 1962-63 the Government of Newfoundland rented to the Federal Government its right to impose Corporation Income Tax, Personal Income Tax and Estate Tax. In lieu of these rights the Province received from Ottawa sums of money as stated in Tax Rental Agreements.

Other Subsidies and Fiscal Payments (Federal)
Includes payments on account of various agreements in effect for various periods over time i.e. Entitlement under Terms of Union; Transitional Grant; Atlantic Provinces Adjustment Grant; Statutory Subsidies; Post Secondary Education Grant; the Provinces share of Federal Income Tax on Power Utilities; Revenue Guarantee; Estate Tax; Established Program Financing Grant.

Grants In Aid and Shared Cost Contributions (Federal)
Includes federal contributions on account of specific current account expenditure programmes: i.e. Manpower Training Programmes; Hospital Insurance Plan; Canada Assistance Plan; Medical Care Plan; Regional Economic Expansion Agreements, etc.

\section*{Other Provincial Sources:}

Includes tax on Premium Income of Insurance Companies; Tax on Fire Insurance Premiums; Tobacco Tax; Forestry Management Tax; PariMutuel Tax; Succession Duties; Motor Vehicle and Drivers Licences; Mineral Taxes and Royalties; Other Privileges Licences and Permits; Sales of Goods and Services. Fines and Penalties; Interest; Other Enterprize Profits; Employee Contributions to Pension Funds; and other taxes and miscellaneous revenue sources.

\section*{Capital Account}

\section*{Federal Grants-In-Aid and Shared Cost Contributions}

Includes federal contributions on account of specific capital account expenditure programmes: i.e. Health Resource Fund; Trans Canada Highway, Trunk Roads and Roads to Resources Agreements; Regional Economic Expansion Agreements etc.

\section*{Provincial Sources}

Sales of Goods and Services; Repayments of Advances; Returns on Investments etc.

None

Table G-3

None

\section*{Table G-4}

Debenture Debt
Outstanding debentures issued by the Province less sinking funds Included are debentures issued in Canadian and Foreign currencies as well as those due to the Government of Canada on account of Canada Pension Plan Borrowings; Federal-Provincial Special Loan Programmes; and borrowings from the Department of Regional Economic Expansion.

\section*{Guaranteed Debt and Other Liabilities}

Is comprised of outstanding debentures (net of sinking funds) and other obligations of the Newfoundland and Labrador Hydro Electric Corporation; other Crown Corporations and Agencies; Municipalities; Hospitals; School Boards; and Commercial concerns guaranteed as to payment of principal and interest by the Province. Also included is the long-term debt of the City of St.John's and Provincial housing corporations not guaranteed by the Province but considered as underlying debt, and outstanding debt secured by long term lease arrangements entered into by the Province, its crown corporations and agencies.

\end{tabular}

Notes: 1 - With the exception of Personal and Corporation Incosie Tax, rates are effective April i unless otherwise specified.
2 - Since, 1962, Personal and Corporation Income Taxes have been collected on behalf of the Province by the Federal Government. Prior to this time the Tax Rental Agreement was in effect. The rates shown for Personal Income Tax from 1962 represent the provinces share of Federal "beaic" Personal Incone Tax. The rates shown for Corportation Income Tax represent the \% of that tax collected by the Federal Government and abated to the Province. Rates shown for both Personal and Corportation Tax are effective January 1, unless otherwise specified.
3-Effective March 29, 1949.
4 - Effective November 15, 1950
5- Effective prior to 1949.
6 - Act passed May 20,
8 - Effective July 1.
9 - Repealed September 1, 1968.
10 - Effective June 10.
11 - Effective June 1 .
12 - Effective April il.
13 - Effective November 25.
14-Effective July 1.
16 - Rate of \(56.6 \%\) effective January 1, 1977 reflecting extra tax points allocated to the Province under the Federal-Provincial Arrangements and Established Programs Financing Act. The rate increased to \(58.0 \%\) effective July \(1,1977\).
17 - Effective May 1st.
18-12\% on small business
19-Effective March 18. Retail Sales Tax reduced to \(8 \%\) six months beginning April 10, 1978.
20 - Effective July 20.

ii) \(4 \%\) tax on all forms of media advertising. Advertising costing less than \(\$ 20\) or placed in publications of non-profit organizations is not taxable,

23- Effective March 28.
Additional Data: Exemptions, Statutory Authorities.

\section*{SECTION H}

\section*{BANKING AND FINANCE}

\section*{SECTION "H"}

Table H-1

Total Income
Total Income is the aggregate of income items subject to tax assessment.

Total Tax Payable
Total tax payable is the amount of Federal Tax Payable and Provincial Tax Payable.

Table H-2

None

Table H-3

None

Table H-4
Taxable Corporation Income
The amount subject to income tax for the taxation year and consists of current year positive taxable income less prior year losses. Taxable Income is allocated to the Province on the basis specified in the Income Tax Regulations.

\section*{Table H-5}

This table presents quarterly balances of short term and intermediate term credit extended by selected holders to individuals for the purchase of commodities or services for personal consumption as follows:

Sales, Finance and Consumer Loan Companies
i) Installment Financing - Conditional sales agreements held by those companies in connection with the financing of retail purchases of consumer goods and paid in instalments. The amounts shown excluding
    finance charges;
    ii) Personal Cash Loans - (Small) - Personal
    Cash Loans of up to \(\$ 1,500\) made by companies
    licenced under the Small Loans Act. Amounts
    shown are net of interest and other finance
    charges;
iii) Personal Cash Loans (other) - Personal cash
    loans of over \(\$ 1,500\) usually repaid in in-
    stalments. Amounts shown exclude unearned
    finance charges.

\section*{Chartered Bank Personal Loans}

Personal loans other than those fully secured by marketable bonds and stocks and other than home improvement loans. Includes bank - sponsored credit - card balances.

Credit Unions and Caisses Popularies - Personal Loans Only.
Other types of short term and intermediate term credit extended to individuals not included in this table are policy loans by Life Insurance Companies; Accounts receivables of Retail Outlets and utilities; amounts owed by personal (noncommercial) credit card holders of oil companies, airlines, auto rental and international travel and entertainment credit-card issuing companies; and personal loans by trust and mortgage companies.

Also excluded are fully secured loans and long term indebtness, such as residential mortgages and home-improvement loans.

\section*{SECTION I}

\section*{PRICE INDEXES}

\section*{SECTION "I"}

\section*{TABLE I-1}

\section*{Consumer Price Index}

The Consumer Price Index measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specified time period. The 'basket" is an unchanging or equivalent quantity and quality of goods and services, consisting of items for which there are continually measurable market prices over time.

\section*{TABLE \(\mathrm{I}-2\)}

Family - The family or spending unit is defined as a group of persons dependent on a common or pooled income for the major items of expense and living in the same dwelling or one financially independent individual living alone. Never married sons or daughters living with their parents are considered as part of their parents spending unit. In the great majority of cases members of spending units with two or more persons are related by blood, marriage or adoption, and are thus consistent with the "economic family" definition employed in surveys of consumer finance.

\section*{TABLE I-3}

\section*{House 1}

This is a basic detached wood-frame bungalow with clapboard, metal or patent siding (rarely brick) five to eight years old with 3 bedrooms, \(1 \frac{1}{2}\) bathrooms, fireplace and one car garage in full basement but no recreation room or appliances. The total area of the house using outside dimensions but not including the garage is 1,200 square feet and the house is situated on a fully serviced 5,500 square foot lot. There is a \(\$ 25,000.00\) mortgage on the house and the house is typical of others in the neighbourhood. The neighbourhood itself is average and within average commuting distance of the city centre.

\section*{House 2}

This is a detached 2 storey wood-frame house with stone or brick veneer front, patent siding elsewhere, five to eight years old with 4 bedrooms, \(2 \frac{1}{2}\) bathrooms, main floor family room, 1 fireplace, 2 car attached garage and full basement but no recreation room and no appliances. The total area of the house using outside dimensions but not including the garage is 2,000 square feet and the house is situated on a fully
serviced 7,500 square foot lot. There is a \(\$ 45,000.00\) mortgage on the house and the house is typical of others in the community. The location is prime residential and is within average conmuting distance of the city centre.

\section*{SECTION J}

\section*{AGRICULTURE}

\section*{SECTION "J"}

TABLE J-1
Census Farm
Census Farm - is defined as an agricultural holding of one acre or more with sales of agricultural products during the twelve month period prior to the Census of \(\$ 50\) or more. In 1976 this value was changed to sales of \(\$ 1,200\) or more.

Table J-5
Type of Farm
Type of farm indicates that 51 percent or more of sales were in that area of farming.

\section*{SECTION K}

\section*{FISHERIES}

TABLE K-7
Fishermen
Engaged in the Fishery is defined to cover the time spent preparing for, actually fishing, and storing boats and gear away after the season. Time spent on repairing boats or gear in the off-season is not included but such time spent in the fishing season is included.

Before 1969 "Engaged in the Fishery" included not only time spent in catching fish, but also time spent on shore preparing boats and fishing equipment, processing fish, repairing shore installations, and performing other unpaid activities connected with the fishery, and also time spent receiving unemployment insurance payments if such payments were earned as a result of fishing activities.

Casual - those who are engaged in the fishery for less than five months.

Full-Time - those who are engaged in the fishery for over 10 months of the year.

Part-Time - those who are engaged in the fishery for a period of over five and up to 10 months.

FORESTRY

\section*{TABLE L-1}

A logging establishment is a unit which is engaged in logging and related activities (such as felling, bucking, skidding, hauling, trucking, booming, towing, etc.). In most cases the establishment coincides with the firm. However, firms that have more than one establishment are requested to submit a separate census of logging report for each logging establishment which can meet the reporting requirements under the definition of an "establishment".

The number of establishments represents the number of operating units that are principally engaged in logging activities. These units do not represent the total number engaged in logging operations. Numerous logging operations are conducted by establishments classified to other industries (e.g., the sawmill industry) and by farmers and other individuals.

Table L-5
Timber Stumpage - is the change that the government levies on timber cut on crown lands.

\section*{SECTION M}

\section*{MINING}

\section*{TABLE M-2}

\section*{Metallic Minerals}

Includes: cadmium, copper, iron ore, lead, silver, and zinc.

\section*{Non-Meta1lic Minerals}

Includes: asbestos, fluorspar, gypsum, quartz and pyrophylife.

\section*{Structural Materials}

Includes: clay products, cement, sand and gravel, and stone.

\section*{TABLE M-3}

\section*{Cost of Materials and Supplies, Fuel and Electricity}

Generally, consumption of purchased items, only, at laid down cost. Includes, inter-company and intracompany transfers, contract work by others and fuel used by vehicles.

\section*{Establishment, Mining}

Beginning with the 1961 Census of Mines, Quarries and Oil Wells, the establishment is defined as the smallest unit which is a separate operating entity capable of reporting all the following: materials and supplies used goods purchased for resale as such; fuel and power used; number of employees and their pay; man-hours; inventories; and shipments or sales.

\section*{Value Added}

Net output as measured by gross output less purchased commodity input used and contract work by others.
(a) Value added, mining activity: Value of Shipments plus net change in inventory of goods in process and finished goods, less cost of materials and supplies used, fuel and electricity.
(b) Value added, total activity: Consists of (1) value added, mining activity and (2) value added, non-mining activity. The latter is calculated by subtracting relevent commodity inputs from non-mining revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-mining revenues includes depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends and interest.

\hline
\end{tabular}

Note: * - Tons = 2000 lbs
The value of production in this table and in Table M-2 differs from the value of production in Table M-3. For the most part the difference is caused by the transfer of iron ore from Labrador to quebec
for shipment to purchasers. In this table and in Table M-2 the value added in quebec and the transportation costs through Ouebec are included whereas in Table M-3 these costs have been removed.
1-Shipments of fluorspar in 1975 were curtailed due to labour dispute.
3 - The fluorspar mine at St. Lewrence closed in February 1978.
Additional Data: Iron Ore Shipments Monthly

\section*{SECTION N}

\section*{MANUFACTURING}

\section*{SECTION "N"}

\section*{TABLE N-1}

Cost of Materials and Supplies, Fuel and Electricity
Generally, consumption of purchased items only, at laid down cost. Includes inter-company and intracompany transfers, contract work by others and fuels used by vehicles.

\section*{Employees, Salaries and Wages}

Salaries and wages are reported before deductions for income tax and employee benefits and comprise all man-hours paid (for regular work, overtime and paid leave) as well as bonuses, commissions, etc., paid to regular employees. Where shown, production and related workers classified to non-manufacturing activity include separately reported loggers, employees on construction for own use: beginning with the 1970 Census outside pieceworkers formerly included for certain industries are excluded from all employment totals and their remuneration treated as contract work done by others. Sales and distribution employees include all personnel charged to selling expense, certain drivers, etc.

\section*{Establishment}

Smallest operating unit capable of reporting certain specified input and output data, usually a plant or mill.

\section*{Shipments of Goods of Own Manufacture}

Goods made by reporting establishment, or for its account, from its own materials, net of discounts, returns, allowances, sales tax, excise taxes and duties, returnable containers, common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Includes repair and custom revenue, transfers to reporting units of same firm, all exports, book value of own products shipped on rental basis. Unsold domestic consignment shipments are included in inventory. In fabricated structural metal industry, aircraft and aircraft parts manufacturers, railroad rolling stock industry and shipbuilding and repair, value of production is shown in place of shipments in tables on principal statistics. Integrated smelters work on own ore valued at imputed charge to mine.

\section*{Value Added}

Net output as measured by gross output less purchased commodity input used and contract work by others.
(a) Value added, manufacturing activity: Value of Shipments of goods of own manufacture plus net change in inventory of goods in process and finished goods, less cost of
materials and supplies used, fuel and electricity. Value added, total activity: Consists of (1) value added, manufacturing activity and (2) value added, non-manufacturing activity. The latter is calculated by subtracting relevent commodity inputs from non-manufacturing revenues or outputs; these commodity inputs are net of the change in inventories of goods purchased for resale. Non-manufacturing revenues includes depreciable fixed assets produced by own work force for own use, revenue from product rentals, etc., but exclude non-operating revenue such as real property rentals, dividends interest.

\section*{TABLE N-2}

See Table N-1

\section*{Food and Beverage Industries}

Includes: Meat and Poultry Products Industries; Fish Products Industries; Fruit and Vegetable Processing Industries; Dairy Products Industry; Flour and Breakfast Cereal Products Industry; Feed Industry; Bakery Products Industry; Miscellaneous Food Industries; and Beverage Industries.

TABLE N-3
See Table N-1
Fish Products Industry
Includes: establishments primarily engaged in canning, filleting, freezing, curing or otherwise processing fish, molluscs or crustaceans. Establishments primarily engaged in the production of fish meal or oil or marine oil, or in the harvesting and drying of marine vegetable products are also included.

Table N-4
See Table N-1
Wood Industries
Includes: Sawmills, Planing Mills and Shingle Mi11s; Veneer and Plywood Mills; Sash, Door and other Millwork Plants; Wooden Box Factories; Coffin and Casket Industries; and Miscellaneous Wood Industries.

TABLE N-5

Includes: establishments primarily engaged in sawing and planing lumber and those producing ties, spoolwood, lath and other mill products such as cooperage stock and box shooks from round wood.

\section*{TABLE N-6}

See Table N-1
Pulp_and Paper Mills
Includes: pu1p mills producing chemical or mechanical pu1p, and combined pulp and paper mills and paper mills manufacturing newsprint, book and writing paper, kraft paper, paper-board, and building and insulation board.

TABLE N-7
See Table N-1
Printing, Publishing and Allied Industries
Includes: Commercial Printing; Platemaking, Typesetting and Trade Bindery Industry; Publishing Only; and Publishing and Printing.

TABLE N-8
See Table N-1
Non-Metallic Mineral Products
Includes: Clay Products Manufacturers; Cement Manufacturers; Stone Product Manufacturers; Concrete Products Manufacturers; Ready-Mix Concrete Manufacturers; Glass and Glass Products Manufacturers; Abrasives Manufacturers; Lime Manufacturers; and Miscellaneous NonMetallic Mineral Products Industries.

TABLE N-9
See Table N-1

\section*{Metal Fabricating Industries}

Metal Fabricating Industries (except Machinery and Transportation Equipment Industries) includes: Boiler and Plate Works; Fabricated Structural Metal Industry; Ornamental and Architectural Metal Industry; Wire and Wire Products Manufacturers; Hardware, Tool and Cutlery Manufacturers; Heating Equipment Manufacturers; Machine Shops; and Miscellaneous Metal Fabricating Industries.

TABLE \(\mathrm{N}-10\)

See Table N-1

\section*{Chemicals and Chemical Products Industries}

Includes: Manufacturers of Mixed Fertilizers; Manufacturers of Plastics and Synthetic Resins; Manufacturers of Pharmaceuticals and Medicines; Paint and Varnish Manufacturers; Manufacturers of Soap and Cleaning Compounds; Manufacturers of Toilet Preparations; Manufacturers of Industrial Chemicals; and Miscellaneous Chemical Industries.

\section*{TABLE N-11}

See Table N-1

Transportation Equipment Industries

Includes: Aircraft and Aircraft Parts Manufacturers; Motor Vehicle Manufacturers; Truck Body and Trailer Manufacturers; Motor Vehicle Parts and Accessories Manufacturers; Railroad Rolling Stock Industry; Shipbuilding and Repair; Boatbuilding and Repair; and Miscellaneous Vehicle Manufacturers.

Notes: 1-Data for the 1957-1969 period are compiled on the basis of the 1960 Standard Industrial Classification; for 1970 and subsequent years, on the 1970 Standard Industrial
2 - Beginning with 1970, the cost of fuel and electricity for small establishments is included in the cost of materials and supplies.
3 - Beginning with 1961, when statistics were first published for "Manufacturing Activity" and "Total Activity", data on "Total Employees" and "Total Salaries and Wages" are not directly comparable with earlier statistics under the same headings.
AJditional Data: Mo-illy; Census Divíszon, Larger Urban Centres; Mo=e esail

\section*{SECTION O}

\section*{INVESTMENT}

\section*{SECTION "0"}

Table 0-1

\section*{New Capital Expenditures}

Include the cost of procuring, constructing and installing new durable plant and machinery, ( which normally have a life of more than one year) whether for replacement of worn or obsolete assets, or as net additions to existing assets. Included are all capitalized costs such as architectural, legal and engineering fees, as well as the value of work on capital assets undertaken by firms with their own labour force. Gross outlays are reported without any deduction for scrap or trade-in value of old assets. Excluded are expenditures made for the acquisition of previously existing structures, for used machinery and equipment unless imported and for land since outlays of this type involve only the transfer of property and not the creation of a capital asset.

\section*{Construction}

Includes building construction and all types of engineering construction such as roads, dams, transmission lines and pipelines, as well as oil drilling and mine development. The machinery and equipment category takes into account the purchase of all such items which are used either in producing goods or providing services but does not cover durable goods purchased for personal use. Included, as well as industrial machinery, are transportation equipment, agricultural implements, professional and scientific equipment, office and store furnishings and other similar capital goods. Excluded, for the purpose of this report, are outlays for machinery and equipment by the Department of National Defence.

\section*{Housing}

Housing is not generally considered a capital expenditure in the sense mentioned above but it has been included because it forms a large proportion of construction expenditures and has cyclical fluctuations similar to those which characterize business, institutional and government capital expenditures.

\section*{The Repair Expenditures}

Represent the non-capitalized outlays made to maintain the operating efficiency of the existing stock of durable physical assets. These repairs
and maintenance expenditures exclude, however, the routine care of assets such as in oiling and cleaning of machinery. Where the repair costs are large enough to materially lengthen the expected serviceable life of the assets, increase its capacity or otherwise raise its productivity, they are treated as capital expenditures on new construction or on new machinery and equipment.

\section*{SECTION P}

\section*{CONSTRUCTION AND HOUSING}

\section*{Apartment}

An apartment is a dwelling unit in an apartment building (multidwelling structure other than a double house or row house), or a house that has been converted into apartments. This includes dwelling types such as triplexes, quadruplexes, etc. or apartments in a non-residential building such as a school, or over a store.

\section*{Duplex Dwelling}

A duplex is one of two dwelling units located one above the other in a building adjoining no other structure.

\section*{Dwe11ing}

A dwelling is a structurally separate set of living premises with a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. The entrance must be one that can be used without passing through anyone else's living quarters.

Row Dwe11ing
A row dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by common or party walls extending from ground to roof.

\section*{Semi-Detached Dwelling}

A semi-detached dwelling is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

\section*{Single-Detached Dwelling}

A single detached liwelling is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure.

\section*{TABLE P-3}

See Table P-2

TABLE P-4

See Table P-2

TABT.F. P-5
See Table P-2

TABLE P-6
See Table P-2

TABLE P-7

\section*{Double-Wide Domestic Mobile Home}

A double-wide domestic mobile home consists of domestic mobile homes separately towable but designed to be joined into one integral part.

\section*{Mobile Home}

A domestic mobile home is a movable dwelling, constructed to be transported on its own chassis, at least 10 feet wide and 40 feet long, capable of being connected to utilities for year round living - (including permanent provision for eating, sleeping, cooking and sanitation). See also Double-Wide Domestic Mobile Home.

TABLE P-8

\section*{Family (Census Family)}

A census family consists of a husband and wife (with or without children who have never been married, regardless of age) or a parent with one or more children never married, living in the same dwelling. A family may consist, also, of a man or woman living with a guardianship child or ward under 21 years for whom no pay was received.

\section*{Household}

A person or a group of persons occupying one dwelling unit is defined as a household. The number of households will therefore be equal to the number of occupied dwellings

\section*{SECTION Q}

\section*{TRANSPORTATION}

TABLE Q-5
Domestic
The departure from a gateway to another Canadian Airport.

Inbound
Shows direction of travel to destination.
Outbound
Refers to main city at beginning of travel。
Transborder
A flight to or from the United States.

TABLE Q-6
Deplaned
All arriving traffic is reported as being deplaned at the airport where the flight terminates.

Enplaned
All departing traffic is reported as being enplaned at the point where the flight originates.

\section*{SECTION S}

ENERGY

\section*{Commercial Rates}

Includes users of electricity that pay a commercial rate as defined by the seller. Retail stores, schools and hospitals are included in commercial rates.

\section*{Domestic}

Includes users of electricity that pay a domestic rate as defined by the seller. Usually includes residential use, such as private homes, apartments and cottages. Large apartments with one meter i.e. bulkmetered apartments may be classified under general service. Domestic also includes farm.

Farm
Includes users of electricity that pay a farm rate as defined by the seller

\section*{Industries}

Includes establishments engaged in the generation, transmission and distribution of electricity not classified as utilities.

Power Rates (General Service Rates)
Includes users of electricity that pay a power rate as defined by the seller. Large farms and bulk-metered apartments are included in power rates.

\section*{Utilities}

Includes establishments primarily engaged in the generation, transmission and distribution of electricity, whether owned by governments or not.

\section*{Watt-Hour}

A watt-hour is a unit of work equal to the power of one watt operating for one hour.

TABLE S-2

\section*{Installed Generating Capacity}

Installed generating capacity is the nameplate rating of a generator. It is the capacity as designed.

\section*{Kilowatt}

A kilowatt equals one thousand watts. A watt is the meter-kilogramsecond unit of power, equivalent to one joule per second and equal to the power in an electrical circuit in which a current of one ampere flows across a potential difference of one volt.

TABLE S-3

See Table S-1, S-2

TABLE S-4

See Table S-1, S-6

TABLE S-5

See Table S-1

TABLE S-6

See Table S-1
B.T.U. (British Thermal Uni.t)

The B.T.U. is the amount of heat required to raise the temperature of one pound of water one degree Fahrenheit.

\section*{Aviation Gasoline}

Aviation gasoline includes all gasoline type fuels used in piston-type aircraft engines.

\section*{Aviation Turbo Fuel}

Aviation turbo fuel includes all fuels used in turbo-jet or straight jet aircraft engines.

Diese1 Fuel Oil
Diesel fuel oil includes all grades of distillate fuel sold for diesel engine use.

Heavy fuel oil includes all grades of residual type fuels (including low sulphur) for both steam and diesel engines; Bunker fuel oil (including Bunker \(A, B\) and \(C\) ); fuel oils nos. 4, 5, or 6: and residual fuel oil.

Light Fue1 Oil
Light fuel oil includes all distillate type fuels for power burners; fuel oil No. 2 (heating oil No. 2); fuel oil No. 3 (heating oil No. 3); furnace fuel oil; gas oils; and light industrial fuel.

Motor Gasoline
Motor gasoline includes all gasoline type fuels used in internal combustion engines other than aircraft.

\section*{Stove Oil and Kerosene}

Stove oil and kerosene includes distillate type kerosene; kerosene; mineral lamp oil; No. 1 fuel oil; and stove oil (including all vapourizing burner oil).

TABLE S-7
Household

A person or a group of persons occupying one dwelling unit is defined as a household. The number of households will therefore be equal to the number of occupied dwellings.

\section*{SECTION T}

\section*{TRADE AND SERVICES}

\author{
SECTION "T"
}

Table T-1

None

Table T-2
None

Table T-3

Passenger Cars
Denotes all vehicles whose principal function is to carry passengers, including those used for commercial purposes. (i.e. taxis, rented automobiles and limousines, and other fleets).

Commercial Vehicles
This term limited solely to "trucks" and "buses", this designation applies regardless of the use to which such vehicles are put.

Table T-4

None

Table T-5

Alcoholic Beverages
Volume and value of alcoholic beverages (Canadian and Imported products)
sold (i) by liquor authorities to final consumers and to holders of licences to resell; (ii) by wineries and breweries to holders of licences to resell and (iii) by wineries and brewers' retail outlets. Value figures do not represent the final retail selling price of alcoholic beverages as mark-ups by licencees are not included.

\section*{Net Sales and Receipts}

Excluded are sales taxes collected by businesses for remittance to any government agency and non-operating income such as service and carrying charges on credit accounts, bank interest and interest on investments, rent (Real Estate only), etc.

\section*{Licenced Restaurants}

Establishments engaged in selling mainly prepared food for consumption on the premises and with a licence to sell alcoholic beverages. Receipts from food and alcohol sales must be \(40 \%\) or more of total revenue. If alcohol sales are \(75 \%\) or more of total revenue, the establishment will be classified to (Beverage Rooms, Bars and Night Clubs). Licenced restaurants, which form an integral part of the operational activities of a hotel or accommodation establishment, are not included under this classification.

\section*{Unlicenced Restaurants}

Establishments, as described above, but without a licence to sell alcoholic beverages. Receipts from food sales must be \(40 \%\) or more of total revenue.

Drive-in Restaurants
Establishments which sell prepared food from a limited menu of fast-food items (e.g., hamburgers, hot dogs, chicken, etc.) for consumption on or off the premises. Automobile parking facilities are provided, as well as seating and/or car service.

\section*{Take-Out Food Shops}

Establishments which prepare and sell packaged or wrapped meals of specific foods for consumption away from the premises. Such establishments usually concentrate on a particular line of food (e.g., Chinese, pizzas, chicken,etc.) and may offer limited seating facilities.

Caterers (Industrial, Social and Mobile)
Establishments that prepare and serve food and beverages under contract on the premises of manufacturing plants, office buildings, schools, etc. They may also prepare food on their own premises for delivery to luncheons, parties, banquets and receptions and may also provide associated services such as the serving of food and bar tending. This classification also includes mobile caterers.

TABIE T-6 (cont'd)

\section*{Refreshment Stands}

Establishments often designated as hot dog stands, sandwich bars, soda fountains, etc., which sell such items as hot dogs, hamburgers, soft drinks, ice cream, etc. Such establishments are usually operated on a seasonal basis and are usually located on a roadside, on beaches or at other amusement locations selling food items for consumption in the vicinity. Drive-in restaurants are covered in a separate classification.

Beverage Rooms, Bars and Night Clubs
Establishments which sell alcoholic beverages for consumption on the premises. Food may be sold in minor quantities and entertainment may be provided. Such establishments forming an integral part of the operational activities of a hotel or accommodation establishment are not included here. Sale of alcoholic beverages must be 75\% of total revenues.

TABLE T-9
Province of lading indicates the province in which the goods were first laden aboard a carrier for export, which may not in all cases represent the province in which the goods were grown, extracted or manufactured.

\section*{TABLE T-10}

Province of clearence indicates the province in which the goods were cleared by Customs either for immediate consumption or for entry into a bonded Customs Warehouse, this may not always coincide with the province in which the goods are consumed or enter the productive process. Goods are usually cleared at the first Canadian port but they can be bonded and travel to destination point for clearence. Therefore, total domestic imports represents only those goods that have been cleared in Newfoundland and for example, not goods that have been cleared in New Brunswick and travelled to Newfoundland at a later date.

\end{tabular}

NOTE: The data were compiled through a sample survey of retail establishments. The annual total of sales from the Retail commodity Survey will not correspond with the annual total of retail sales resulting from the monthly Retail Trade Survey as sh.wr in Table f-I. The major causes of the discrepancies being differences in sample between the two surveys: the repartin unit being the "establishments" In the Re Commodity Survey
commodity Survey.

SUURE: Statistics Canada, Retall Comodity Survey, 1968 (63-518)

1979 & \(652,553,000\) & \(228,974,000\) \\
1980 & \(734,016,000\) & \(342,810,000\)
\end{tabular}

\footnotetext{
Notes: Exports refer to goods leaving the province which are destined for foreign countries. Port of lading is used to determine the origin of domestic exports. Since iron ore from Labrador is shipped from Sept. Isle - Pointe Noire these exports are shown for Quebec.

Imports ref.er to those goods entering the province from foreign countries.

Exports and Imports do not refer to goods shipped to or from other parts of Canada.

\section*{SECTION U}

\section*{TOURISM}

\section*{Licenced Tourist Establishments}

Licenced tourist establishments include hotels, motels, motor-hotels, inns, cabins, hospitality homes, hunting and fishing camps and trailer parks.

TABLE U-1
NUMBER OF LICENCED TOURIST ESTABLISHMENTS AND
NUMBER OF HOTEL - MOTELS ACCOMODATION UNITS
NEWFOUNDLAND AND LABRADOR, 1971 TO 1980
\begin{tabular}{lcc} 
Year & \begin{tabular}{c} 
Licenced Tourist \\
Establishments
\end{tabular} & \begin{tabular}{c} 
Hotel- Motel \\
Accommodation Units
\end{tabular} \\
\cline { 2 - 3 } 1971 & 364 & 2,420 \\
1972 & 472 & 2,529 \\
1973 & 408 & 2,723 \\
1974 & 380 & 2,837 \\
1975 & 390 & 2,987 \\
\(1976^{1}\) & 325 & 3,108 \\
1977 & 295 & 2,871 \\
1978 & 307 & 2,936 \\
1979 & 295 & 3,660 \\
1980 & 312 &
\end{tabular}

Note: 1 - The major reason for the extreme decrease in the number of licenced tourist establishments in 1976 over the 1975 level is that the number of licenced hunting and fishing camps licenced in 1976 was 96 versus the 1975 level of 166.

\section*{SECTION V}

\section*{POLITICS AND GOVERNMENT}

\title{
SECTION 'V'
}

TABLE \(V-2\) and TABLE \(V-3\)

\section*{Registered Voters}

Registered Voters are all those persons who have been enumerated as qualifying voters at a time prior to an election.

\section*{Persons Voting}

Persons voting are all those persons who cast a ballot at an election. A person casting a ballot need not be a registered voter because the Election Act provides that any person qualified to be a voter but who is not a registered voter may vote in an election after first taking the appropriate oath. Therefore it is possible that the total persons voting could exceed the total registered voters in a provincial election.

TABLE V-5

\section*{Provincial Government Enterprises}

A provincial government enterprise is an organized entity, usually corporate, which (a) is established by a political decision-making body to produce goods and/or services for sale on the open market at a price related to costs, (b) maintains an independent system of accounts that permits the charging of specific elements of costs against the revenue derived from its sale of goods and/or services, (c) has a relatively autonomous management in the conduct of day-to-day operations, and (d) is staffed by personnel not normally subject to the statutory requirements governing employment in the general public service.

As of 1976 the Provincial Government Enterprises were as follows:
Burgeo Fish Industries Limited, Churchill Falls (Labrador) Corporation Limited, Division of Northern Labrador Services, Elizabeth Towers Limited (subsidiary of St. John's Housing Corporation), Harmon Corporation, Hotel Buildings Limited, Labrador Linerboard Limited, Marystown Shipyard Limited, Newfoundland Fibreply Limited, Newfoundland and Labrador Housing Corporation, Newfoundland Liquor Corporation, Power Distribution District of Newfoundland and Labrador, St. John's Housing Corporation.

TABLE V-6

Federal Government Enterprises
Federal government enterprises include Air Canada, Canadian Broadcasting Corporation, Canadian National Railways, Canadian Overseas Telecommunications Corporation, Canadian Saltfish Corporation, Central Mortgage and Housing Corporation, Federal Business Development Bank, National Harbours Board.

\hline
\end{tabular}

Notes: No. of employees is the average number for the year.
Gross Payroll is the total for the year.
Starting the second quarter of 1973 there is a structural change in this table. The title Total General Government Employment and Gross Payrolls consists of Government Departments, Administrative, Regulatory and Special Funds and Government Owned and Financially Supported Institutes. This change has resulted in the addition of: Newfoundland and Labrador Computer Services, Newfoundland Farm Products Corporation, Newfoundland Medical Care Commission, College of Trades and Technology, and College of Fisheries, to Government Employment and Payrolls. The only deletion from employment and payrolls is Memorial University of Newfoundland.

Total general government and provincial government enterprises: (1) Number of employees is the sum of the average of general government and government enterprises employees, (2) gross payroll is the sum of the gross payrolls of general government and government enterprises.
Additional Data: by month, number of employees and gross payroll by province and type of organization, departmental services and type of employee, of administrative, regulatory and special funds, of government-owned and financially supported institutions and quarterly summaries of salary and wage earners for general government services

No. of employees is the average number for the year.
Gross payroll is the total for the year.
Total general government and federal government enterprises: (1) number of employees is the sum of the average of general government and government enterprise employees, (2) gross payroll is the sum of the gross payrolls of general government and government enterprises.

Additional Data: Monthly: by province, by function and occupational category; quarterly: total regular payroll, overtime and retroactive salary increase payments.

SECTION W

JUSTICE

\section*{SECTION 'W"'}

TABLE W-2

\section*{Crimina1 Code}

Under Section 91 of the B.N.A. Act the Parliament of Canada has the exclusive legislative authority on the subject of criminal law, except the Constitution of Courts of Criminal Jurisdiction, but including the procedure in criminal matters. Within this authority, the Parliament of Canada passed an Act Respecting the Criminal Law R.S.C. 1970 c. C-34. The short title of the Act is the Criminal Code.

\section*{Federal Statute}

A valid federal statute is the written will of the Parliament of Canada, so long as the purpose of the legislation is within the jurisdiction of Parliament. A federal statute is assented to by the Governor-General of Canada.

\section*{Provincial Statute}

A valid provincial statute is one passed by the provincial legislature (in Newfoundland this is the House of Assembly) and assented to by the Lieutenant-Governor of Newfoundland. The purpose of provincial legislation must be within the jurisdiction of that legislative body.

\section*{Municipal By-Law}

Municipal by-laws are a form of subordinate legislation made by local governments who derive their power from the provincial legis1ature.

\section*{SECTION - XENVIRONMENT}

\section*{TABLE X-1}

Maximum temperature represents the average highest recorded temperature per day for a given month.

Minimum temperature represents the average lowest recorded temperature per day for a given month.

For St. John's, normal temperature (maximum, minimum, mean) are standards derived through averaging over a thirty-eight year period.

For Gander, the averaging time period is forty years.
For Goose Bay, the averaging time period is thirty-eight years.

\section*{TABLE X-2}

Degree day is the difference of the daily mean temperature from \(18^{\circ} \mathrm{C}\) which is a heating degree standard. For example if the daily mean temperature on a given day in January is \(1^{\circ} \mathrm{C}\) then 17 degree day units are required to attain the standard of \(18^{\circ} \mathrm{C}\).

Sunshine is recorded as hours and tenths of bright sunshine.
For St. John's, the normal degree days is obtained through averaging over a thirty-eight year period while sunshine is averaged over a thirty-three year period.

For Gander, the averaging time period is forty years.
For Goose Bay, the averaging time period is thirty-eight years.

TABLE X-3
Precipitation levels of rain and snow are not additive to give total precipitation. This is because snow (CM) is melted down to give water content (MM) and thus the standard ratio of 10:1 does not necessarily hold true depending on the quality of snow.

Wind direction is the direction (true north) from which wind is blowing.

For St. John's and Goose Bay the normals are derived through averaging over a thirty-eight year period.

For Gander, the averaging time period is forty years.
A11 norms are updated every ten years.
