Footnotes:

<sup>1</sup> To ensure respondent confidentiality, estimates below a certain threshold are suppressed. For Canada, Quebec, Ontario, Alberta and British Columbia suppression is applied to all data below 1,500. The threshold level for Newfoundland and Labrador, Nova Scotia, New Brunswick, Manitoba and Saskatchewan is 500, while in Prince Edward Island, estimates under 200 are suppressed. For census metropolitan areas (CMAs) and economic regions (ERs), use their respective provincial suppression levels mentioned above. Estimates are based on smaller sample sizes the more detailed the table becomes, which could result in lower data quality.

<sup>2</sup> Excluding the territories.

<sup>3</sup> Number of hours actually worked by the respondent during the reference week, including paid and unpaid hours. In January 1997, the Labour Force Survey questionnaire was changed to allow responses up to 168 hours per week. Prior to 1997, the upper limit was set at 99 hours.

<sup>4</sup> The total for "Main job" and "All jobs" is the same because it represents the number of employed persons, regardless of whether they have one or more jobs.
